6. Information Non-Action Items:

A. A Serious Pest of Citrus Trees Found in Lincoln Area

Asian Citrus Psyllid, a serious pest of citrus trees, was recently discovered for the first time in Placer County on four backyard citrus trees in Western Lincoln. The Placer County Agriculture Department and California Department of Food and Agriculture have embarked on a robust survey, detection trapping, and treatment program in a core area around the find site. To date, no additional psyllids have been found. Asian Citrus Psyllid is a threat because it can spread the fatal citrus disease known as Citrus Greening or Huanglongbing. All collected insect and plant tissue samples were tested for Huanglongbing, and have been determined to be free from the disease. The California Department of Food and Agriculture has established a regulatory quarantine extending roughly five miles around the original pest location. This quarantine encompasses portions of Rural Lincoln and the community of Sheridan. By law, it is prohibited to move citrus plant material from within the quarantine boundaries. Presenter is Josh Huntsinger, Agriculture Commissioner, Placer County Agriculture Department. For more Information contact JHuntsinger@placer.ca.gov or call 530-889-737

B. Update on recent Phone Service Disruption in Sheridan

A Public Affairs representative from AT&T, Alice Perez, will discuss the recent disruption of phone service in Sheridan. She will explain the reasons for the restoration delay of service. Ms. Perez will ask for questions from the community and provide further information.

7. Action Item: None

8. Announcements and Information

9. Adjournment to next regular meeting on November 09, 2016
